EDUCATION

Bachelor of Science in Computer Science, minor in Mathematics
University of Arkansas, Fayetteville, Arkansas

Graduation: Fall 2021

SKILLS SUMMARY

PROGRAMMING LANGUAGES AND FRAMEWORKS

- React-Native, Ionic, Python, Java, C++,HTML ,PHP, JavaScript, SQL, AWS (Amazon web services), Azure DevOps, GitHub and shell script.

LANGUAGES

- Spanish – Native, English – Fluent

CERTIFICATIONS

- The Complete React Native + Hooks
- First Aid, AED and CPR

PROFESSIONAL EXPERIENCE

ObiiGo

August 2021 – December 2021

Jr. Developer

- Improved authentication process on the ObiiGo app by sending a confirmation code and adding password reset functionality using AWS Cognito. Programming on .NET for backend and Ionic for front end
- Researching bugs and creating bug reports for developers to use while working on projects
- Creating work items depending on the needs of the company for developers to complete
- Interview developers to assess their capabilities to work on specific projects
- Manage a group of developers, prioritizing and assigning projects

J.B. Hunt

June 2020 - May 2021

Information Service Intern

- Worked with a group of interns to create Toggle to activate Dark Mode on the J.B. Hunt Drive mobile application using React Native
- Piloted Dark mode functionality to 11 out of 14 screens in the J.B. Hunt Drive mobile application to create a better user experience
- Worked with a full-time development team on the J.B. Hunt Drive mobile application with an agile project management
- Refactored a file on the application created for the J.B Hunt Hackathon by separating the different functionalities into components which reduced the code from 1680 lines to 543 lines
- Implemented the newly designed email template for the J.B. Hunt Drive mobile application lumpsum message so the recipient receives an email with the information in a table format, and the logo of the company, instead of plain text
- Validated my work items to make sure that they were ready for release date

RELEVANT PROJECTS

Senior Design Project

Spring 2021

- Worked with a group of students to create an inventory mobile application using React Native
- Added functionality for the application to scan items and autofill information
- Created a top bar component that has a hamburger button with a search button to for all the items that stored in the database
- Worked on the user interface of the application to achieve a minimalist look

Mobile Programming Project

Fall 2020

- Created an application to take pictures and store them in a map with a pinpoint on the coordinates they were taken on a for android devices using java in android studio
- Used android studio to create a functioning calculator for android devices
- Created to-do list application on android studio that used an API to read and store the data on a database
- Developed a Covid-19 risk calculator app using android studio in which the user would be able to calculate the risk of everyday activities depending on their location and the circumstances of the activity
